SAPIENCE VUE

Workforce Efficiency

INCREASE EFFICIENCY WITH WORKFORCE ANALYTICS.

KEY FEATURES

- Optimize Workforce Efficiency

- Increase Success Across Remote, Hybrid and Office Teams

- Improve Employee Wellbeing and Engagement

- Accelerate Workforce Productivity

- Protect Employee Privacy

Technology has transformed the modern workplace. Employees are enjoying flexible working arrangements that allow them to connect and collaborate from any location. However, this change comes with it's own set of challenges. Workforce analytics solutions provide business leaders with realtime people insights and improve efficiency, productivity and teamwide success—no matter where your teams are working.

OPTIMIZE WORKFORCE EFFICIENCY

How can you support your leaders to optimize the efficiency of their team? Sapience Vue provides powerful data on daily work processes, to help analyze work patterns, identify top performers, and highlight opportunities for improvement.

- Automate manual tasks to measure workforce productivity.
- Model the work of top performers, sharing best practices across your workforce.
- Use predictive analytics to anticipate problems and assist in capacity planning.
- Measure true productivity through industry-specific software integrations.

MANAGE ACROSS REMOTE, HYBRID AND OFFICE TEAMS

Today's hybrid and remote work environments require a manager who can lead teams working from any location while improving productivity, efficiency and collaboration.

- Get visibility into daily and historic work patterns of remote office teams.
- Measure progress over time to keep activities and projects on track.
- Compare productivity of remote and in-office workdays.

IMPROVE EMPLOYEE WELLBEING AND ENGAGEMENT

Create a culture that encourages work-life balance, recognizes and rewards effort, encourages professional growth, and empowers employees to own success.

- Increase engagement by giving team members access to their own data.
- Identify overworked teams and re-distribute workload to reduce stress.
- Leverage Wellness Check reporting to identify indicators of burnout.
- Enable customized coaching and development plans to encourage
professional growth.

PROTECT EMPLOYEE PRIVACY

Sapience takes privacy seriously. Get peace of mind with built-in privacy features and industry-standard security protection. Sapience Vue only captures data on work-related activities. Any time spent on non-work-related applications or activities is marked as "private."
