

# SAPIENCE

## REPORTING & DASHBOARDS

ADVANCED, CUSTOMIZED, INTERACTIVE DASHBOARDS

Sapience blends work pattern data from your existing business systems into actionable insights for the enterprise. With more than 20 powerful dashboards, leaders can analyze workforce activity, efforts, and outcomes to drive better decisions with Sapience BI (Business Intelligence).

Just point and click to modify existing dashboards to reveal different data points, or create customized dashboards focused on specific company KPIs or departmental goals.

### Key Features

#### Modify

out-of-the-box dashboard fields, filters, and charts in minutes.

#### Create

an unlimited number of custom dashboards—without an army of BI experts.

#### Utilize

AI and machine learning to accelerate and automate analysis.

#### Distribute

reports to designated stakeholders, so they can track their progress on specific KPIs or business goals.

## PERSONALIZE STANDARD DASHBOARDS

Sapience BI is designed to help business leaders quickly extract insights from their data to guide operational decisions. If you want to personalize one of our standard reports, add a field, or change the look, no problem. The solution makes it easy to serve up your data your way—without relying on business analysts or data scientists for help.

- **Change chart types, widgets, colors, and filters by selecting from many available options.**
- **Add custom fields, productivity metrics or specific data from new integrations.**
- **Add your own distinctive touch to your favorite standard reports.**

## BUILD YOUR OWN CUSTOM WIDGETS AND DASHBOARDS

Personalization drives adoption. So, if our standard reports do not meet all your needs, our toolbox makes it easy for you to build your own custom dashboards in minutes. Access your data and analyze it in a way that maps your business goals and KPIs. You can even apply your own business logic to dashboards and reports, based on internal calculations.

- **How much time is spent working on documentation using Microsoft or in meetings using Zoom.**
- **How much time workers are spending on core versus non-core activities.**
- **Assign overrides to apps or URLs for specific users or departments.**

## PUBLISH AND SHARE YOUR INSIGHTS THROUGH SAPIENCE

Whether you want to leverage data to support organizational transparency or want to share data at a department, team and individual level, Sapience BI allows you to flex your analytical muscles by sharing insights in Sapience. Your custom reports can be viewed and accessed by other users in your organization alongside the other out-of-the-box reports in Sapience.

## HARNESS THE POWER OF AUGMENTED ANALYTICS

Our solution utilizes machine learning analytics to assist with data preparation and automate analysis, so you can analyze more data, more quickly, to support your day-to-day decisions with confidence.

Your data is your competitive advantage—driving optimization, improving efficiency, reducing costs, and providing a clear path to your business goals.
